All Access Points and Switches – 12 years old and not supported

Little to no visibility into devices or applications

Trouble shooting and connectivity problems extremely difficult

Current cabling and hardware infrastructure insufficient to support needs

Security challenges

Current Network Status

Meraki

The Solution

- 1 District Reference Cases
- 2 Central Management and Visibility
- 3 Expansion Capabilities
- 4 Support
- 5 Increased Security

E-rate Portion
(Cash on hand)

The Cost

Best-in-class network management

WiFi 6 Access Points – New standard and future-proof

Multi-gigabit switches – Capable of current traffic and IP speakers/VOIP

New cabling at sites needed in order to utilize the new technology

Sustainability and stability for 5+ years

6th year of licensing at no cost (approx. \$17,500 value)

Complete installation and design of the network

Approximately \$155,000 of USAC use-it-or-lose-it money to supplement

What We Are Getting

Thank you!
