

DISTRICT FIELD TRIPS

EQUITY

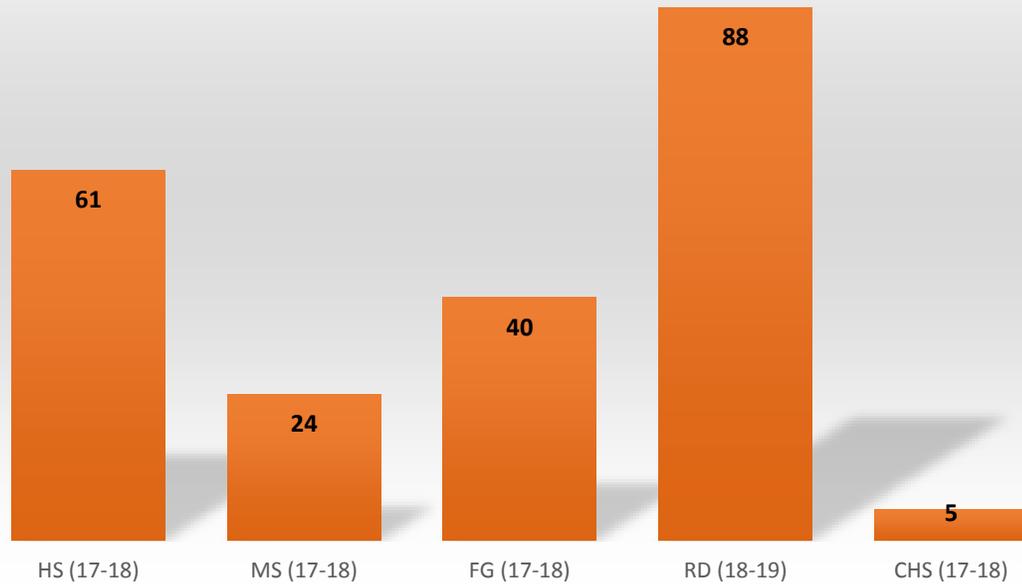

- “...when the term equity is raised, it often evokes a zero-sum scenario; a perception that if we do more for those who are disadvantaged it will mean there will be less for the advantaged. When this occurs and the pursuit of equity-which we define as a commitment to ensure that every student receives what he or she needs to succeed-is subverted by the assumption that there must be winners and losers, rarely is any progress achieved. Invariably, conversations about equity either degenerate into acrimonious debate over how to serve the needs of both privileged and disadvantaged children, objectives that are typically perceived as irreconcilable, or we lapse hopelessly into a state of paralysis.” (Blankstein and Noguera, pg. 3)
